

HUHUTECH

HUHUTECH International Group Inc.

High-Purity Process Systems & Factory Monitoring for the Pan-Semiconductor Industry

Nasdaq: Huhu

Investor Presentation · June 2026

Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact — including those regarding future results of operations and financial position, business strategy and plans, and objectives for future operations — are forward-looking. Words such as “believe,” “may,” “will,” “estimate,” “continue,” “anticipate,” “intend,” and “expect” identify forward-looking statements. These statements are based largely on current expectations and projections about future events and trends believed to affect the Company’s financial condition, results of operations, strategy, and needs, and are subject to risks, uncertainties, and assumptions, including those described under “Risk Factors” in the Company’s filings with the U.S. Securities and Exchange Commission.

New risks emerge from time to time, and it is not possible for management to predict all risks or assess the impact of all factors on the business. Actual results could differ materially and adversely from those anticipated or implied. You should not rely upon forward-looking statements as predictions of future events. Except as required by applicable law, the Company undertakes no duty to update any forward-looking statement after the date of this presentation.

Non-GAAP financial measures. This presentation references adjusted operating income and adjusted net income, which exclude non-cash share-based compensation. These are non-GAAP measures and are not a substitute for GAAP results. A reconciliation to the most directly comparable GAAP measures is provided in the Appendix. Market and industry data are attributed where used; see the closing notes.

THE INVESTMENT CASE

Why HUHUTECH

A profitable, cash-generative systems integrator embedded in semiconductor capital spending — now scaling across Asia, Europe, and North America.

Mission-critical to chip fabs

High-purity gas and chemical delivery systems plus facility monitoring are essential infrastructure in every advanced fab — the “picks and shovels” of semiconductor capex.

Revenue +18% to \$21.4M

FY2025 revenue grew 18.1% YoY with gross profit up 8.1%; the business generated \$2.9M of positive operating cash flow.

Five-country platform

Operating subsidiaries in China, Japan, Germany, the U.S., and Singapore — Japan alone now contributes 44% of revenue.

Defensible technology base

32 effective patents, 28 software copyrights, and ISO-certified processes underpin a modular, software-led product suite.

Underlying profitability

FY2025's GAAP loss is driven almost entirely by an \$18.4M non-cash share-based comp charge; excluding it, operations were profitable.

Scalable, software-led model

Standardized PLC modules let clients expand monitoring without re-engineering — expanding margins as the installed base grows.

The "Picks & Shovels" of Semiconductor Manufacturing

HUHUTECH designs, integrates, and monitors the high-purity systems that keep advanced manufacturing running. Through our operating subsidiaries, we serve semiconductor, optoelectronic, LED, and micro-electronics, telecom, and logistics customers across Asia, Europe, and North America.

High-Purity Process System (HPS)

Customized high-purity gas and chemical delivery systems that control impurities across core IC manufacturing processes.

Factory Management & Control System (FMCS)

Software-led, real-time monitoring that consolidates facility systems into a single control center.

\$21.4M

Five-Country Operating Platform

FY2025 Revenue by Geography

From a China engineering base to a multi-market platform

HUHU Japan completed 199 projects in FY2025 and now drives 44% of revenue. New subsidiaries in Germany, the United States, and Singapore extend the model to customers building fabs outside China — broadening the addressable market and diversifying geographic concentration.

Two Core Systems, One Integrated Offering

We deliver the full lifecycle — design, installation, and value-added services — for the systems that move and monitor high-purity gases and chemicals inside our customers' plants.

High-Purity Process System (HPS)

Largest contributor to revenue

- High-purity gas conveyor systems — gas cabinets, valve manifold boxes, monitoring software, pipes and fittings
- Used in doping, photolithography, etching, and CVD film-formation processes
- High-purity chemical conveyor systems for cleaning, corrosion, and grinding
- Delivered as an end-to-end solution: design, installation, and value-added services

Factory Management & Control System (FMCS)

Software-led and modular

- Consolidates multiple plant monitoring systems onto a single platform
- Gas Monitoring System (GMS) provides around-the-clock control of gas transport
- Chemical Monitoring System (CMS) safeguards the chemical distribution process
- Control-room architecture with live status across the entire facility

High-Purity Process System

The high-purity process system applies effective control of impurities across the production process. It is used in the core processes of integrated-circuit manufacturing in the pan-semiconductor industry, and is the largest contributor to our revenue.

High-Purity Gas Conveyor System

Special gas cabinets, valve manifold boxes, monitoring software, gas pipes and valve fittings. Used in doping, photolithography, etching, and CVD film-formation. The largest single contributor to revenue.

High-Purity Chemical Conveyor System

Consolidates high-purity chemical pipes, valves, chemical sensors, and monitoring software to convey the chemicals used in cleaning, corrosion, and grinding processes.

What We Deliver

Overall Solution Design

End-to-end system architecture tailored to each customer's process

Installation

On-site build-out, integration, and commissioning of the full system

Value-Added Services

Ongoing support, optimization, and lifecycle services

Factory Management & Control System

Our FMCS provides instant, effective monitoring of customers' manufacturing processes through a central control room. We prioritize the software layer — the source of efficiency, scalability, and recurring engagement.

A Defensible, Software-Led Technology Base

 32

Effective patents

 28

Registered copyrights

TM 9

Registered trademarks

 1

Registered domain name

All registered in China, as of the date of the FY2025 annual report.

Software Solution Modularity

- Mature PLC algorithms: adding detectors, gas cabinets, or valve-manifold boxes requires no re-download of the PLC program.
- Fewer program updates means fewer errors and less customer downtime.
- Software simulation lets us test and improve without interrupting live equipment; customers can add monitoring applications themselves.

Certifications & Qualifications

- ISO 9001 Quality Management System
- ISO 14001 Environmental Management System
- ISO 45001 Occupational Health & Safety Management
- First-class qualification for professional contracting of mechanical & electrical installation engineering
- Recognized Technology-Driven SME (Jiangsu Province)

Investing Ahead of the Technology Curve

R&D is directed at improving existing products and developing new features. We plan to keep R&D spending above prior-year levels and to deploy half of our IPO proceeds toward a new 5,000-square-meter R&D plant in Wuxi.

Ultrapure water control system

Gas detection systems

Process-line temperature automatic control

Process-line cleaning control systems

FMCS-related technology & new equipment

Ultrapure water system control software

R&D Expense

FY2025 R&D reflects lower third-party technical-consulting fees and material costs versus FY2024. Management expects spending to rise as the new R&D plant comes online.

MARKET OPPORTUNITY

Riding the Semiconductor Capex Super-Cycle

Every advanced fab depends on high-purity gas and chemical delivery and on continuous facility monitoring — exactly the systems HUHUTECH integrates. As global chip investment scales, so does demand for our layer of the value chain.

~\$697B

Global semiconductor sales projected for 2025, up from ~\$627B in 2024

\$1T

Industry sales milestone on track for 2030 (~7.5% CAGR)

#1

Asia-Pacific is the largest and fastest-growing semiconductor region

Structural demand drivers

AI & data-center chip demand

New fab construction across Asia, U.S. & EU

Photovoltaic & optoelectronic build-out

Sovereign semiconductor policies

Of FY2025 revenue generated in Japan

from 33.9% in FY2023

Consistent, high-quality products

Long-term client relationships

Strong industry reputation & qualifications

Strategy: We intend to expand our marketing and sales team with a focus on increasing sales in targeted geographies and customer segments, cross-selling new services to existing customers, and deepening market penetration as new-country subsidiaries mature.

Four Growth Levers + Recent Catalysts Validate the Strategy

1. Client Development

Leverage experienced team and established relationships; cross-sell new services to existing customers; deepen market penetration as new-country subsidiaries mature.

3. Expand Product Range

Move into water-supply, power-supply, HVAC and ventilation systems; add annual maintenance, software, and module-replacement programs.

2. Research & Development

Continue investing in R&D; improve existing technology and extend FMCS and related new equipment. Plans to construct a 5,000 sq.m. R&D plant in Wuxi.

4. Geographic Expansion

Scale newly established subsidiaries in Japan, Germany, U.S., and Singapore to diversify revenue beyond China.

Recent Catalysts

NOV 2025

HUHU USA secures first \$3.0M order in Arizona semiconductor corridor

JAN 2026

Hiroshima Project Office opened; qualified supplier status at leading local fab

APR 2026

FY2025 annual results filed (Form 20-F); revenue \$21.4M, op. cash flow +\$2.9M

MAY 2026

HUHU Deutschland awarded €13.9M (~\$15M) contract from Dresden foundry

MAY 2026

Follow-on \$936K U.S. contract from Arizona anchor customer

Three Years of Consistent Growth

Total Revenue (\$M)

FY2025 by Revenue Stream

+18.1%

YoY revenue growth

281%

growth in product sales — the fastest-rising stream

Commentary

The increase in total revenue was led by a \$3.4M rise in product sales and modest growth in system-integration projects. The Company completed 284 system-integration projects in FY2025, up from 143 a year earlier, even as the mix shifted toward a larger number of smaller, shorter-cycle contracts. Geographically, China contributed 52.7% of revenue and Japan 44.1%, with early contributions from the new U.S. and Singapore subsidiaries.

Profitable Operations Beneath a Non-Cash Charge

Gross Profit (\$M) & Gross Margin

Gross margin by year

The FY2025 loss is non-cash

GAAP net loss **\$(17.3)M**

Add back: share-based comp (non-cash) **\$18.4M**

Adjusted net income (non-GAAP) **~\$1.0M**

\$2.9M

positive operating cash flow in FY2025, versus \$(3.0)M used a year earlier — the business funded itself while reporting a GAAP loss.

Why the loss? FY2025 operating expenses included an \$18.4M non-cash share-based compensation charge recorded in G&A. Excluding it, the Company generated roughly \$1.3M of operating income. Selling expenses fell 31% and the balance sheet remained in positive equity, with no going-concern qualification from the Company's PCAOB-registered auditor.

A Funded, Positive-Equity Balance Sheet

\$4.4M

up from \$20.2M

\$7.4M

Total shareholders' equity

remains positive

\$2.9M

Operating cash flow

FY2025, positive

Selected Balance-Sheet Items (as of December 31)

US\$	FY2025	FY2024
Cash & restricted cash	\$4.73M	\$3.32M
Total current assets	\$17.20M	\$14.62M
Total assets	\$22.36M	\$20.18M
Total bank debt	\$5.51M	\$5.27M
Total liabilities	\$14.95M	\$13.66M
Total shareholders' equity	\$7.42M	\$6.53M

Capitalization at a glance

- 24,103,749 ordinary shares outstanding at year-end 2025; additional paid-in capital rose to \$23.1M.
- Accumulated deficit reflects the FY2025 non-cash share-based compensation charge, not cash losses.
- Audited under U.S. GAAP by Wei, Wei & Co., LLP (PCAOB-registered); no going-concern qualification.

Experienced Management Team

Industry operators who entered the semiconductor-monitoring market early and have led HUUH China since its founding.

Yujun Xiao

Chief Executive Officer & Director

- Founded HUUH China in 2015; CEO since 2021
- Founded Shanghai Huhu Technology (2010–15), CEO
- Head of engineering, Shentong Computer (2006–10)
- BSc, machinery manufacturing & automation, Suzhou Top Institute of IT

Huiping Zhang

Chief Financial Officer

- CFO since July 2021
- CFO of Zhongcheng Zhihui Technology (2017–20)
- CFO roles across multiple companies (2002–20)
- BA in accounting, Jiangsu Open University; Intermediate Accountant (China)

Xiaoming Chen

Chief Technology Officer

- CTO since July 2021; CTO of HUUH China since 2015
- Head of technology, Hanjin Electrical Automation (Kunshan), since 2011
- Engineer across multiple firms since 2009
- Diploma in electrical automation, Xuzhou Industry Career Technical College

Board of Directors

A majority-independent board pairing the founders with legal, audit, and cross-border expertise across China and Japan.

Yinglai Wang

Chairperson & Director

Co-founder

Co-founded Shanghai Huhu Technology (2010); BA in business management, Wuxi Taihu College.

Yujun Xiao

Director & CEO

Founder

Founder & CEO of HUUH China; 20+ years in engineering and automation leadership.

Jin Ma

Independent Director

Audit / Finance

Ex-Deloitte and Motorola Solutions China; ACCA (UK), CPA (British Columbia); co-founder of Brook Partners.

Qi Zheng

Independent Director

Legal

Managing director, Beijing Weiheng (Wuxi) Law Firm; LL.M., Tongji University.

Qiang Li

Independent Director

Legal (Japan)

Attorney at Shanghai Sunhold Law Firm focused on Japan; LL.B. Kumamoto, LL.M. Kyushu University.

A Cash-Generative Way to Own Semiconductor Capex

Embedded in fab spending

Mission-critical high-purity systems in every advanced fab.

Growing and cash-generative

Revenue +18%; \$2.9M operating cash flow; profitable ex-SBC.

Scaling beyond China

Five-country platform with Japan already at 44% of revenue.

Defensible and modular

32 patents, 28 copyrights, software-led FMCS architecture.

APPENDIX

Non-GAAP Reconciliation

The Company presents adjusted operating income and adjusted net income, which exclude non-cash share-based compensation, to illustrate underlying operating performance. These non-GAAP measures have limitations and should be read together with GAAP results.

For the year ended December 31, 2025 (US\$)	GAAP	Share-based comp	Adjusted (non-GAAP)
Total revenues	\$21,431,952	—	\$21,431,952
Gross profit	\$7,083,796	—	\$7,083,796
(Loss) income from operations	\$(17,058,817)	\$18,355,002	\$1,296,185
Net (loss) income	\$(17,344,577)	\$18,355,002	\$1,010,425

\$18.4M

Non-cash share-based compensation recorded in G&A (FY2025)

\$2.9M

Net cash provided by operating activities (FY2025)

\$1.0M

Adjusted net income excluding share-based compensation
